

Model: XNR-S14

Description: RFID tag, number 2 x 1-4

Tags for the XR antennas. Programmed with numbers 1-4 from factory. Comes with two of each, so a total of eight tags.

Wireless detection

The XR antenna pairs with the antenna driver, together they register when someone picks up or puts back a RFID-tagged product on the antenna. On each occasion, the tag number triggers a signal to the Xperience
